Art Unit: 3622

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3,5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horstmann, patent number 6,285,985.

Horstmann teaches an advertising method using software products comprising:

inserting at least one advertisement into at least a portion of a software program (col. 2, lines 1-15, 64-67, col. 1, lines 15-20); making the software program stop in operation during the use of the software program when the advertisement is displayed (col. 3, lines 53-56, col. 4, lines 35-40). Horstmann also teaches accessing the web site of the sponsor by clicking on the web site address (col. 4, lines 10-20); and an advertisement window exists as another open window on the display (col. 4, lines 35-40, col. 3, lines 50-55). While Horstmann does not specifically state that the software program resumes only when the sponsored advertisement is clicked on, it would have been obvious to one having ordinary skill in the art to have allowed the program to resume by clicking on the advertisement since this would have been adopted for the intended use of allowing the user to regain control over the use of the application and increasing user satisfaction with the subsidized software while still monitoring that ads are viewed by the user for the sponsors. It also would have been obvious to have downloaded the program since

Art Unit: 3622

this is well known in the art for convenience in obtaining software and for obtaining software updates (upgrades).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rosen et al., patent number 5,995,102 teaches resuming the software program only when the user clicks on the advertisement (col. 2, lines 5-25). Donohue, patent number 6,202,207 teaches downloading low cost software (col. 1, line 60 – col. 2, line 15). Slivka et al., patent number 6,256,668 also teaches downloading free software (abstract).

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
